

Login Page

Enter Username

1 (Text Field to enter Info)

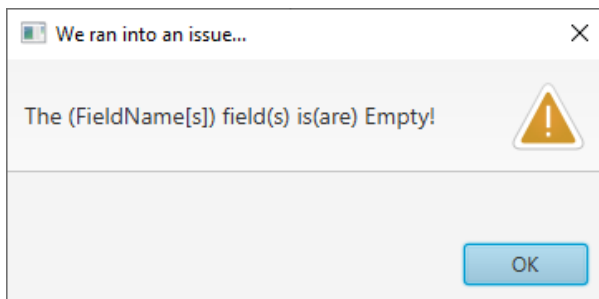

Enter

2(Button)

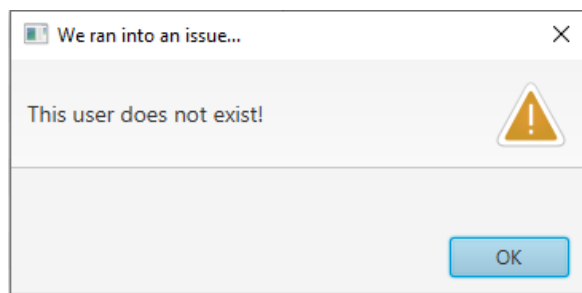

If Username field is still just prompting at Step 2...

FieldName[s] = Username

Is(are) = is

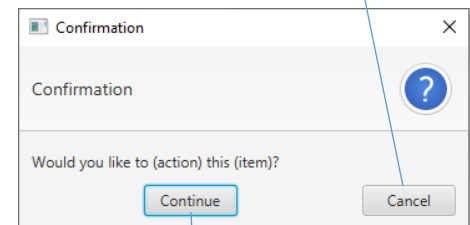

Is (other) Username field is entered but does not exist At Step 1

Action: Login

Item: User

Possible Entries in "Enter Username":

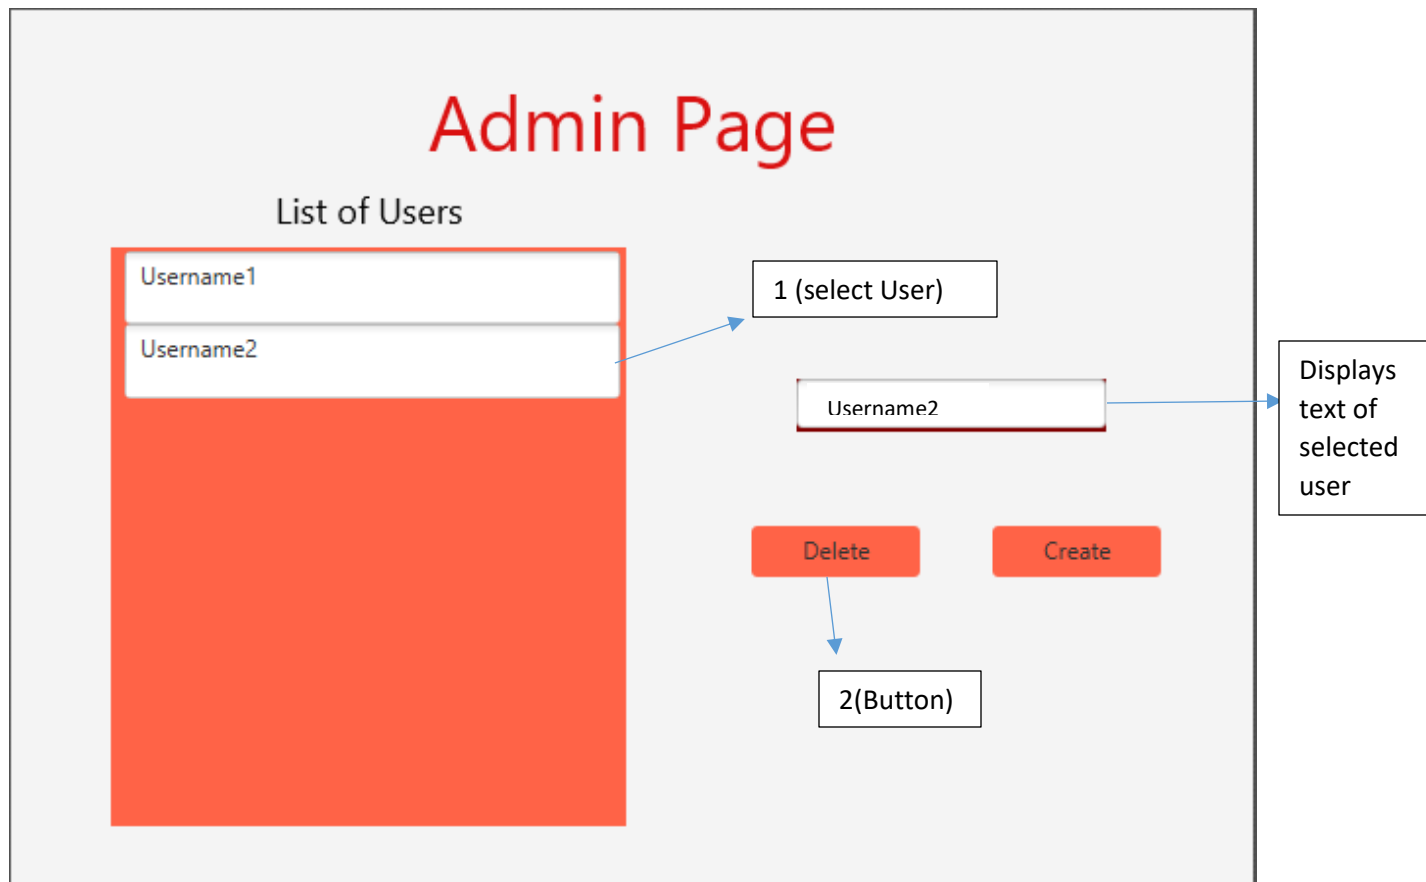

Admin

Stock

Other

Initial Conditions:

"Enter Username" Field is empty except for prompting text

Initial Conditions:

First Item is always automatically selected!

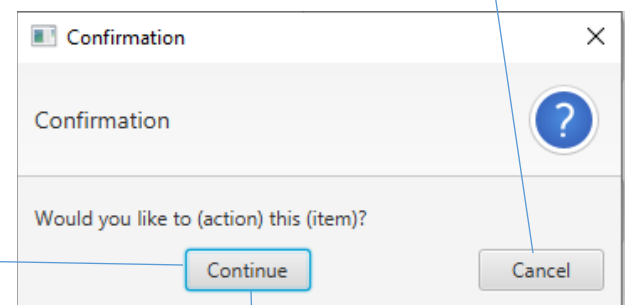

“Username” Text Box Displays Username of selected User (Can be edited!)

If list is empty, textbox just prompts “username”

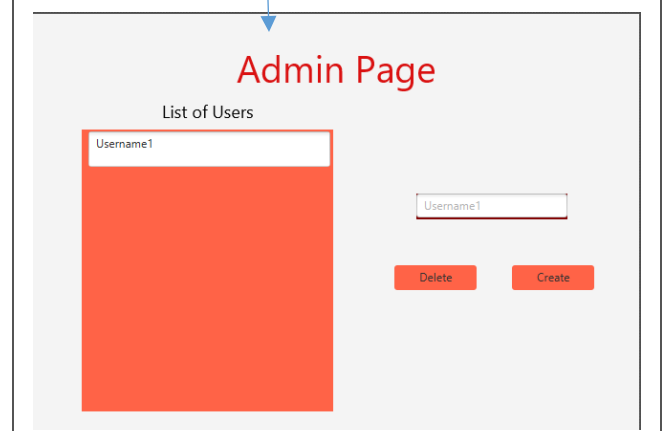

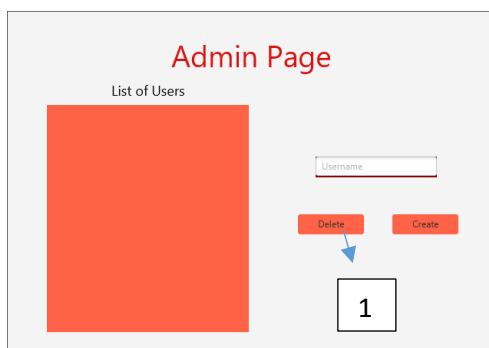

Action 2 Leads to:

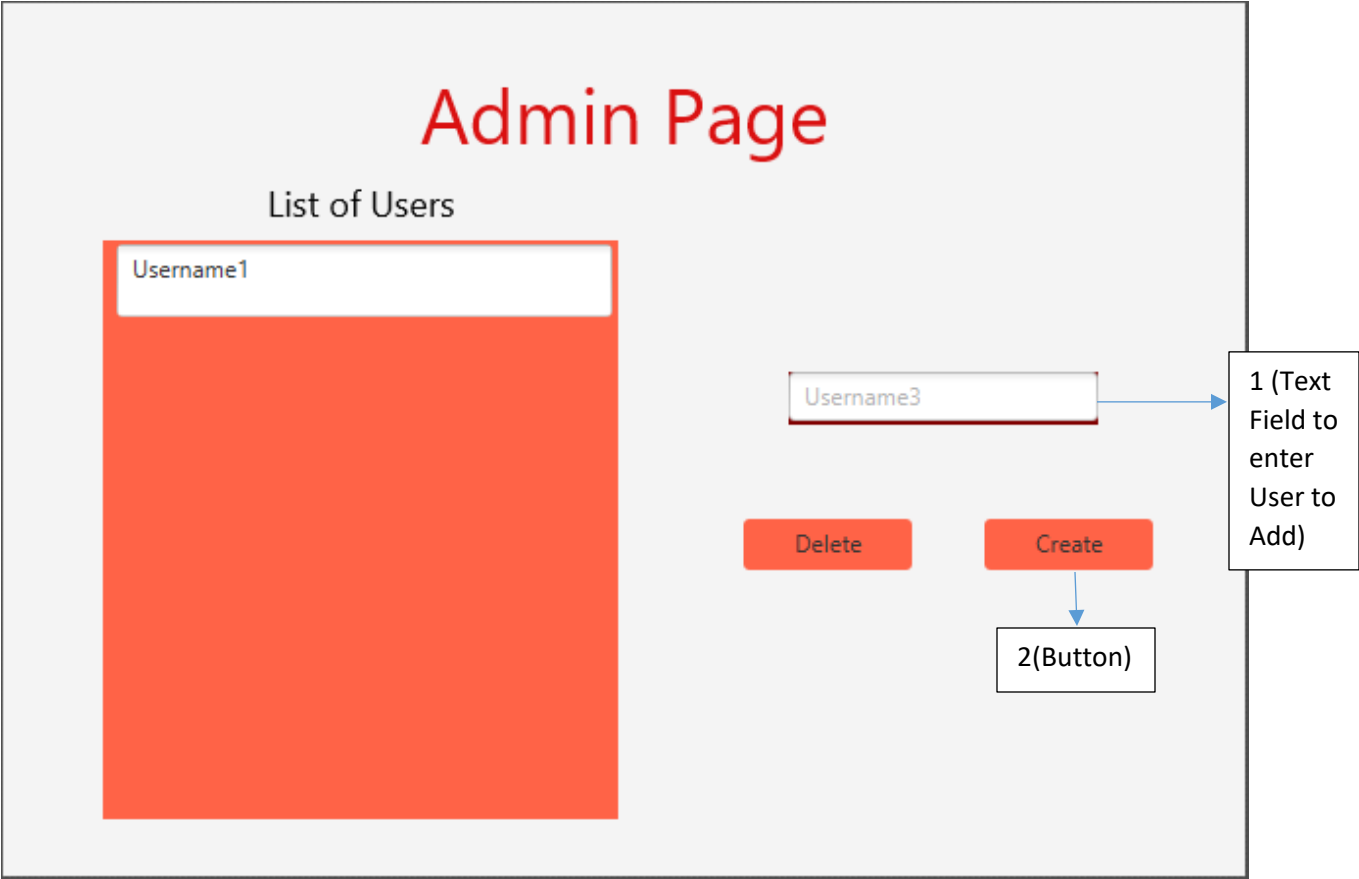

Action = Delete

Item = Username

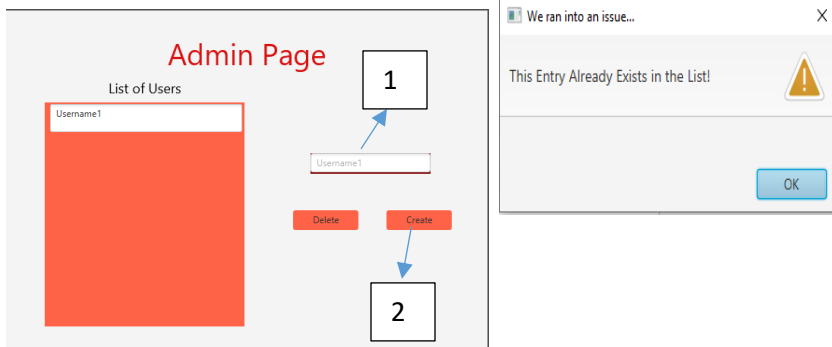

If the list is empty at Step 2 (action = delete)

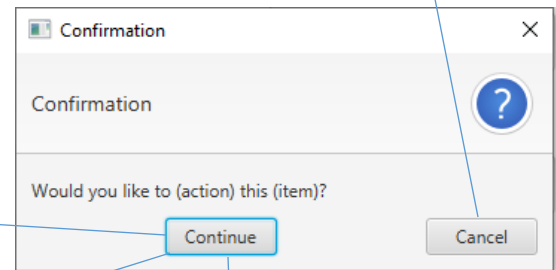

If username already exists in List at step 1...

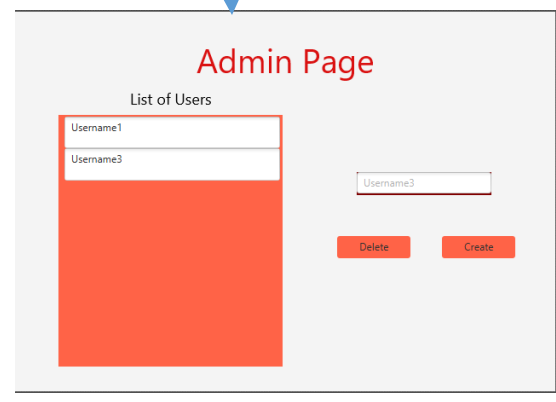

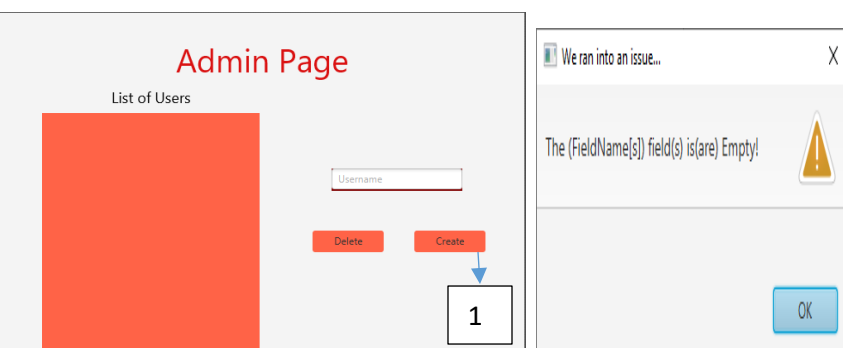

Action 2 leads to:

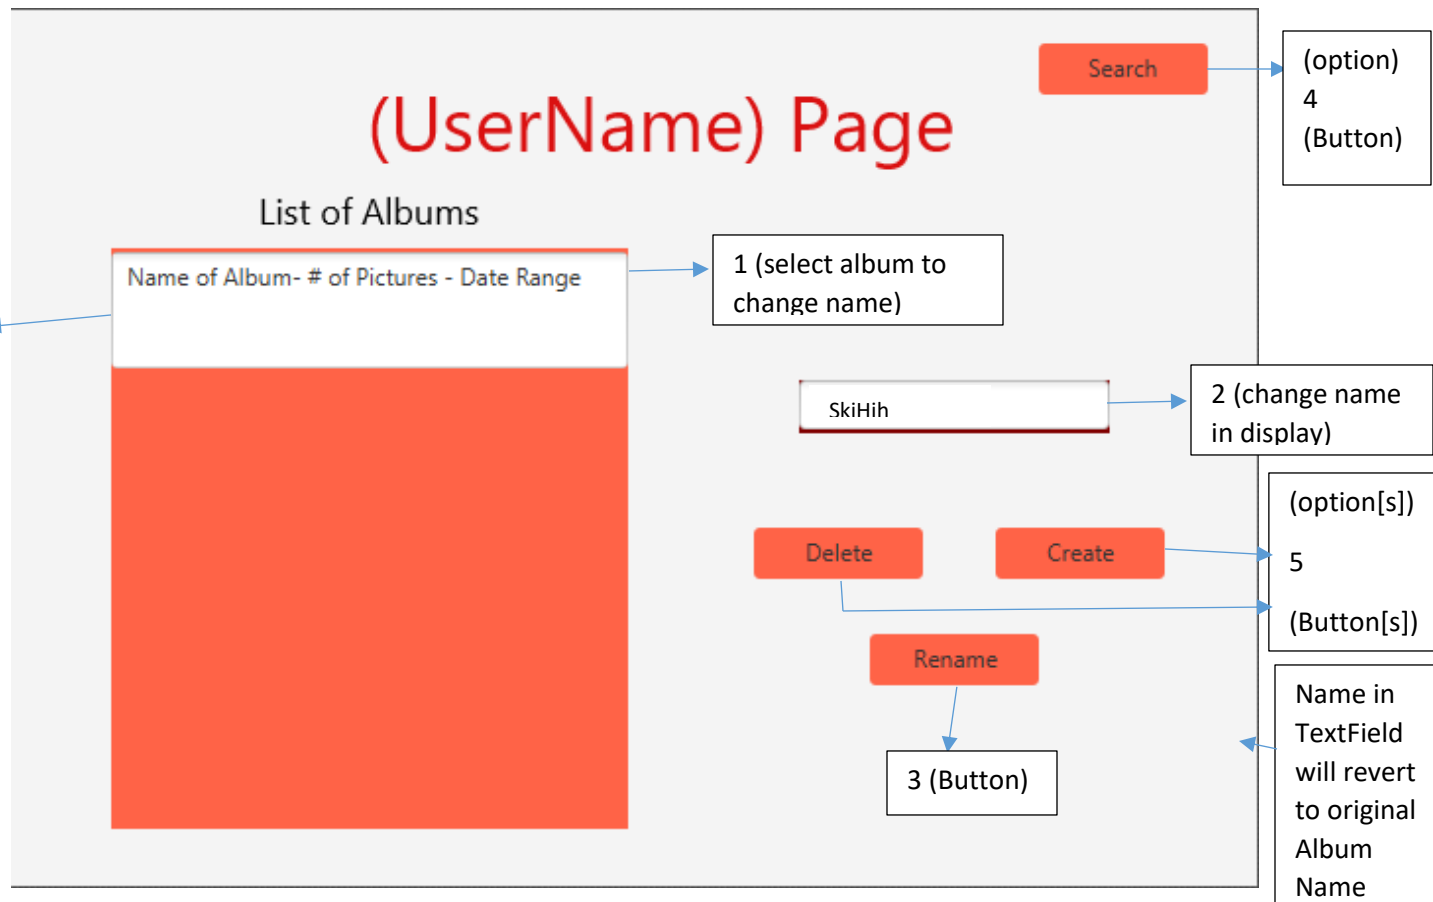

Action: Create

Item: User

If List is Empty at Step 1 and Textbox still displays prompting text at Step 2... (FieldName[s] = Username; is(are) = is)

If list is empty at Step 1...

Same error as shown on **Admin page** for (Delete) Action but instead with (Rename) Action!

Initial Conditions:

First Item is always automatically selected!

"Name of Album" Text Box Displays Album Name of selected Album (Can be edited!)

Double Click on Album in List of Albums to open album contents

(option)4: search Button

GOES TO SEARCH PAGE

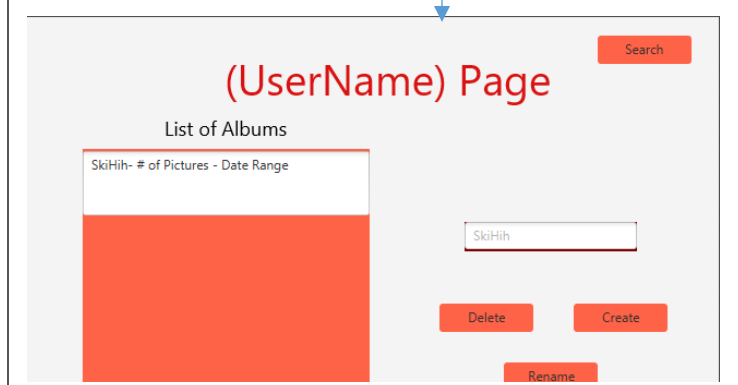

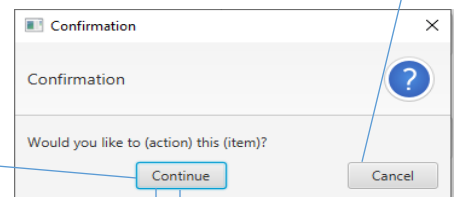

(option[s])5: Delete/Create Buttons

Same actions as what is shown in Admin page(s), but rather than with Users, is done with Albums.

Action 3 leads to:

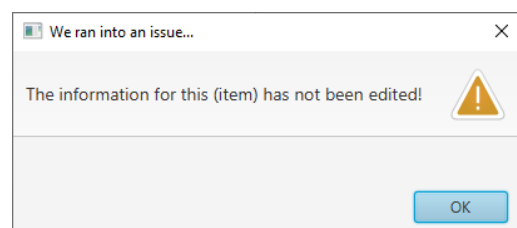

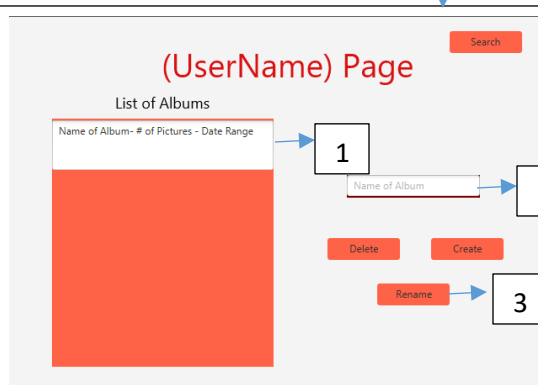

Action: Rename

Item: Album

If name is not changed at step 2:

(item) = Name of Album

Search

Option 2 step 5
(must be done if
step 3+4 are done)
select to search by
"And" or "Or"

Option 1 Step 1:
(select Date Range)

AND/OR Option 2

Option 2 step
2(Enter Value)

Option 2 Step 1 (Select
a tag from dropdown
[location/people/etc.])

Option 1 step
2

Option 2 step
3(If optional
route is not
taken)

Option 2 step
6(otherwise)

Button!

Closes pop-Up
Search box

Will display
Images in List
view after
search button
has been
pressed

Option 3 Step
1 (To be done
only after
search button
has been
pressed)

TextField to
enter new
Album Name

Option 3 Step 2 (Button) Creates
Album with search results!

Initial Conditions:

All fields are initially blank

And/Or selections are
blacked out UNTIL something
is selected/typed into second
Tag/Value Pair, at which
point the "AND" option will
automatically be selected

If Date field only has either start date or end date but not both
(FieldName[s] = start OR end, is(are) = is)

If Tag is filled OR value is filled but not both (FieldName[s] = tag
OR value, is(are) = is)

If neither date range NOR tag/value pair
is filled, (FieldName[s] = "", is(are) = are)

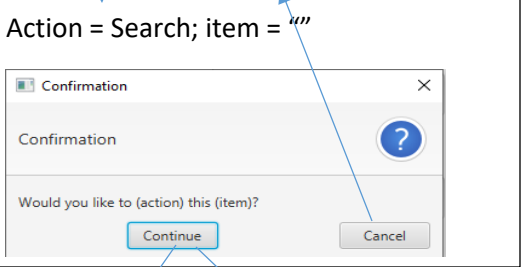

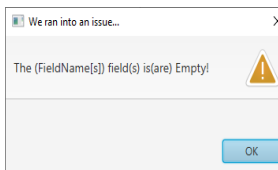

Image List displays list of images
that follow search criteria with
pictures from within all Albums this
specific User has
